

Uni-Web Aramid

Uni-Web Aramid Fiber is a new and easy to apply aramid fiber reinforcement. It consists of a non-woven sheet of unidirectional aramid fibers that are held in position by a fine spider web of polymer fibrils that rest on the surface. The fibril or web system allows the fabric to be cut easily, trimmed, or slit, giving clean edges with absolutely no fraying. The fibers lie flat and straight, and cannot shift or bunch up as often happens with uni-stitched fabrics. Uni-Web Aramid is perfect for high strength, impact resistant applications where exact placement of the fiber is needed. It is compatible with polyester, vinyl-ester and epoxy resins.

Physical Properties

Weight	3.2 oz
Pattern	Unidirectional
Thickness	.008" +/- .005"
Construction Warp	8.1/inch +/- 0.3
Construction Weft	Veil
Yarn Warp	336 tex Kevlar ®
Yarn Weft	Veil
