

EZ-Vac Connector

ACP's EZ-Vac Connector is a reusable all metal, threaded connector that allows a quick and reliable way to connect vacuum hoses to vacuum bags. The connector is made up of two halves, one of which is placed inside the vacuum bag, the other outside. A small hole is slit in the bag allowing the stem of the connector to pass through. The threaded nut is used outside the bag and twisted on the connector, clamping the two halves together, providing a solid and reliable air-tight seal.

Physical Properties

Barbed Fitting	accepts 1/8" ID Neoprene Tubing
----------------	---------------------------------

Technical Properties

Max Temperature	150°F
-----------------	-------

Note: The EZ-Vac Connector works with ACP's 1/8" ID Neoprene Tubing.
