

Econolease Super Release Fabric

Airtech's Econolease is nylon peel ply fabric coated with a silicone release agent designed to prevent bonding with resin and facilitate easy removal in resin rich" conditions commonly found with resin infusion. Econolease offers a tighter weave and increased release properties in comparison to the White Peel Ply. This construction tends to produce a "fine" textured surfaced which is helpful for secondary bonding or painting of the composite laminate. Econolease can be used in conventional vacuum bagging, resin infusion and prepreg part manufacturing.

Physical Properties

Thickness	.004"
Material	Nylon
Color	Light Blue
Coating Type	Silicone
Shelf Life	Indefinite
Weight	1.8 oz/yd ²
Manufacturer	Airtech International
Manufacturer Part Number	Econolease

Technical Properties

Maximum Temperature Use	400 °F (204 °C)
-------------------------	-----------------

Maximum use temperature is dependent upon the duration at maximum temperature and is process specific. Airtech recommends testing prior to use.
